### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1-4, the phrase "locking device" should be change to – A locking device –

Regarding claim 1, the term "a handle" in line 3, is not clear, whether it is the same as "a handle" in line 2.

Regarding claims 2 and 4, the phrase "characterized in that the" is render the claim indefinite form.

Regarding claim 3, the phrase "characterized in that the a" is render the claim indefinite form.

Regarding claim 4, the term "and/or" is render the claim in alternative form.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

**5. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lu (5,584,097) in view of Cheng (6,122,800).**

Lu in figures 1-3, discloses a full handle or a locking device for a telescopic stem for a trolley, wherein the stem comprises an inner stem (30) connected to a handle (10), which may glide within an outer stem (40). The handle has a control at an upper end of the inner stem for controlling the locking of the inner stem in relation to the outer stem. The handle connected to a rod (32) running through the inner stem. The device also includes a toothed friction element (44), which is arranged in the outer stem and the inner stem is equipped with a toothed blocking element (54) locking into the friction element and preventing movement of the inner stem in relation to the outer stem when the blocking element is pressed into the toothed friction element by a conical groove (53) of a housing (52) connected to the rod (32) influencing the position of the housing. Lu fails to show the locking device in a single telescopic stem.

Cheng in figures 4-5, teaches a locking device in a single telescopic stem. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the locking device of Lu with the locking device having a single telescoping device as taught by Cheng in order to reduce number of part.

Regarding claim 2, Lu discloses the friction element, which is arranged on an inner area of the outer stem.

Regarding claim 3, Lu discloses the blocking element, which is arranged on the lower side of the stem opposite the friction element.

Regarding claim 4, Lu discloses the housing or the blocking element that is spring-loaded by a spring (31), automatically affecting locking by the friction element.

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chg discloses a retractable handle assembly.
